Spesifikasi produk lampu towre obstruction LED ini sebagai berikut:

1. operating voltage: DC 12V ±20%
2. rated power consumption: 5 watt (quiescent current ?10mA)
3. type of light source: high brigthness emitting diode
4. light source lifespan: >100.000 hours
5. horizontal lighting angle: 360°
6. effective light intensity: >1600cd
7. light range: >5 km (T=074)
8. flash frequency: 20~60 times/minute (adjustable)
9. light switch sensitivity: 50~300LX
10. glow color: Red (commonly used)
11. working environment: -35°C ~ +60°C
12. battery capacity: 12V 7Ah ~ 12 Ah
13. solar panel power: 5 watt
14. synchronize flash function: GPS wireless sync flash
15. working in continous rain: arount 7~10
16. protection level: IP65
17. chasis size: chasis 180mm pitch center diameter 150mm evenly distributed 4*12mm holes
18. lamp material: body: aluminum alloy, lampshade: PC
19. reference weight: 9kg
20. application area: iron tower (commucations, electricity, microwave, etc), port machinary, wind power generation, high rise building, etc
